

Tematski portali (*subject gateways*) i društveni *bookmarking* : putokazi na stari i novi način

Iva Melinščak Zlodi

Knjižnice Filozofskog fakulteta u Zagrebu

imelinsc@ffzg.hr

Tematski portali i društveni *bookmarking*

- alati različitih generacija, a sličnih namjena (polazišta za istraživanje, sustav putokaza i preporuka za studente/istraživače)
- društveni *bookmarking* - alati koji pripadaju tzv. društvenom softveru ili Webu 2.0
 - iako im to nije primarna namjena, takvi servisi omogućuju probiranje i preporuku kvalitetne mrežne građe, te njihovo okupljanje prema predmetima/temama.
- tematski portali (*subject gateways*) - predstavnici tzv. ere digitalnih knjižnica
- razlike u temeljnom konceptu, izvedbi, popularnosti i održivosti tih alata su velike
- ti alata također impliciraju različite poglede na ulogu i značaj knjižnica i knjižničara u organizaciji informacijskog univerzuma

“Desetljeće digitalnih knjižnica”

- od sredine 90-tih
 - W3C, DCMI
 - časopisi Ariadne, D-Lib
 - JISC
 - projektno zasnovan razvoj usluga
 - teme:
 - D2D (resource discovery, search/metasearch, portals/brokers, federation, harvesting, resolution, metadata formats&protocols)
 - repozitoriji i upravljanje sadržajem
- L. Dempsey. *The (Digital) Library Environment: Ten Years After* (2006.)

Tematski portali

- “*Quality controled subject gateways*”
- karakteristike - prema def. T. Kocha, 2000.
 - podržavaju sustavno otkrivanje mrežne građe
 - razvoj i upravljanje zbirkama (npr. prema objavljenim kriterijima za odabir)
 - bogat opis građe (metapodaci)
 - poboljšan predmetni pristup
 - pregledavanje prema predmetnim hijerarhijskim klasifikacijama
 - korištenje kontroliranih rječnika za predmetno označivanje
 - korištenje standarda

Tematski portali

- ROADS - Resource Organisation and Discovery in Subject-based Services (1997.)
- DESIRE (1998-2000.)
 - suradnja 10 ustanova iz Nizozemske, Norveške, Švedske i VB
- Renardus : Academic Subject Gateway Service Europe (2000-2002.)
 - suradnja 12 europskih zemalja
 - razvija se “*pilot broker service*”
- RDN /Intute (1999.)
 - <http://www.intute.ac.uk>

Društveni *bookmarking* - “socialy mediated retrieval and discovery “

- CiteUlike (<http://www.citeulike.org>)
 - “A free online service to organise your academic papers”
 - 2004. (Richard Cameron privatno, krajem 2006. osnovao tvrtku Oversity Ltd.)
- Connotea (<http://www.connotea.org>)
 - “Free online reference management for clinicians and scientists”
 - 2005-2007., Nature Publishing Group
- Bibsonomy (<http://www.bibsonomy.org>)
 - 2006., Knowledge & Data Engineering Group of the University of Kassel, Germany
 - “social bookmark and publication sharing system - intended to support everyone, but in particular researchers, in sharing bookmarks and bibliographies”
- Del.icio.us (<http://del.icio.us>)
 - Od 2003.g. (krajem 2005. kupio ga je Yahoo)
 - “social bookmarking service”

Del.icio.us

What is del.icio.us?

- del.icio.us is a collection of favorites - yours and everyone else's. You can use del.icio.us to:
 - Keep links to your favorite articles, blogs, music, reviews, recipes, and more, and access them from any computer on the web.
 - Share favorites with friends, family, coworkers, and the del.icio.us community.
 - **Discover new things. Everything on del.icio.us is someone's favorite -- they've already done the work of finding it. So del.icio.us is full of bookmarks about technology, entertainment, useful information, and more. Explore and enjoy.**
 - del.icio.us is a **social bookmarking** website -- the primary use of del.icio.us is to store your bookmarks online, which allows you to access the same bookmarks from any computer and add bookmarks from anywhere, too. On del.icio.us, you can use **tags** to organize and remember your bookmarks, which is a much more flexible system than folders.
 - You can also use del.icio.us to see the interesting links that your friends and other people bookmark, and share links with them in return. You can even browse and search del.icio.us to discover the cool and useful bookmarks that everyone else has saved -- which is made easy with tags.
-
- Clay Shirky: “individual motivation, group value”

Korištenost?

- Intute - u 2005/6.: ~11,5 mil searches/year
- citeulike - ~37 500 visitors/month
- bibsonomy - ~21 000 visitors
- connotea: ~16 500 visitors
- del.icio.us: ~2 200 000 visitors
- registrirani korisnici:
 - citeulike: 33000 (ožujak 2007.)
 - bibsonomy: >5000
 - connotea ?
 - del.icio.us: 2 mil. (ožujak 2007.)

Abstract

“ The Open Archives Initiative (OAI) Protocol for Metadata Harvesting presents one promising method by which metadata regarding archives and manuscripts can be shared and made more interoperable with metadata from other sources. Against the background of archival descriptive theory and practice, this article outlines a method for exposing deep, hierarchical metadata from encoded archival description (EAD) files and assesses some theoretical and practical issues that will need to be confronted by institutions choosing to provide or harvest OAI records generated from EAD files. Using OAI on top of existing EAD implementations would allow institutions to repurpose their data and potentially reach more users but would also accelerate the process of reengineering archival access mechanisms. Archivists and technologists using OAI with EAD must pay careful attention to the necessity of preserving archival context and provenance.

The screenshot shows the CiteULike website interface. At the top, there are browser tabs for 'CiteULike: Tag bio...', 'BioMed Central | The O...', 'Science/AAAS | Scienti...', and 'Computer and Informa...'. The CiteULike logo is on the left, and navigation links like 'Register', 'Log in', and 'FAQ' are on the right. A search bar is also present. The main content area is titled 'Tag bioinformatics' and lists recent papers classified by this tag. On the left, there is a 'Navigation' sidebar with links to Home, Log in, Register, and Discussion list. Below that are 'Journals' and 'Groups' sections. On the right, there is an 'Everyone's Tags' sidebar listing various tags like 'adaptation', 'algorithm', 'analysis', etc.

Uloga knjižnica/knjižničara?

“What happened clearly in the mid-nineties was the convergence of the Web with more pervasive network connectivity, and this made our sense of the network as a shared space for research and learning, work and play, a more real and apparently achievable goal. What also emerged - at least in the library and research domains - was a sense that it was also a propitious time for digital libraries to move from niche to central role as part of the information infrastructure of this new shared space.

However, the story did not quite develop this way. We have built digital libraries and distributed information systems, but they are not necessarily central. A new information infrastructure has been built, supported by technical development and new business model. The world caught up and moved on.”

L. Dempsey

Uloga knjižnica/knjižničara?

- ❑ obrasci/radni procesi učenja i istraživanja se mijenjaju
- ❑ knjižnice moraju naći načina da svoje usluge uklope u te nove radne procese
- ❑ knjižnica postaje samo jedan od izvora građe, ne nužno u centru informacijskog svijeta
- ❑ dodavanje funkcionalnosti weba 2.0 postojećim knjižničnim uslugama

SG vs. SB

- knjižničar kao predmetni znalac i organizator
 - korisnik = krajnji korisnik
 - kontrolirani rječnici, klasifikacije
 - stručnost kao jamstvo kvalitete
 - glomazan i skup sustav
 - knjižnica = turistički vodič po internetu
- knjižničar kao jedan od ravnopravnih korisnika
 - korisnik = stvara / odabire/označava
 - tagovi
 - gomila kao jamstvo kvalitete (“crowdsourcing”)
 - efikasan i jeftin sustav
 - knjižnica = jedna od znamenitosti koju treba vidjeti
